

3 Courses

Data Integration, Data  
Storage, & Data Migration

Data Privacy, Security,  
Governance, Risk and  
Compliance

Enterprise Data  
Architecture and  
Operations

May 5, 2025

**JHON FELIPE URREGO MEJIA**

has successfully completed the online, non-credit Specialization

# Enterprise Data Integration, Governance and Architecture

The certificate holder has developed advanced, job-ready skills to design and manage enterprise data systems. The certificate holder can implement data warehouses, lakes, ETL workflows, and real-time streaming for efficient data operations. They can utilize business-to-business integration, SOAP & REST APIs, and automated data pipelines. The certificate holder can apply governance, compliance, and risk management best practices to secure enterprise data. They can design and implement enterprise data architectures, incorporating policies, procedures, and best practices for data operations, and system migrations. By completing the labs and projects, the certificate holder demonstrated their skills to design, implement, and secure enterprise data systems.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
