**JHON FELIPE URREGO MEJIA**

has successfully completed the online, non-credit Specialization

# AZ-305 Designing MS Azure Infrastructure Solutions Exam Prep

This specialization is specifically designed to prepare the learners for the Designing Microsoft Azure Infrastructure Solutions (AZ-305) exam. By completing this specialization, the learner has gained proficiency in Azure's robust infrastructure services, and designing and implementing scalable, secure, and resilient solutions. The learner also gained insight into fundamental concepts like networking, storage, virtual machines, and security required to design solutions on the Azure platform. This specialization has also helped the learner understand virtual networks, identity management, and how to optimize performance and ensure compliance. Additionally, learners also explored the design of governance, authorization, and authentication solutions.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
