JHON FELIPE URREGO MEJIA

has successfully completed the online, non-credit Specialization

Exam Prep AZ-500: Microsoft Azure Security Engineer Associate

Congratulations! By successfully completing Exam Prep AZ-500: Microsoft Azure Security Engineer Associate. The Azure security engineer should have practical experience in the administration of Microsoft Azure and hybrid environments. The Azure security engineer should have a strong familiarity with computing, network, and storage in Azure, as well as Azure Active Directory, part of Microsoft Entra. This certification validates your expertise in Manage identity and access, Securing networking, computing, storage, and databases, and Managing security operations. By earning this certification, you have positioned yourself as a skilled Azure Security Engineer who can effectively manage and secure Azure environments.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
