JHON FELIPE URREGO MEJIA

has successfully completed the online Professional Certificate

Microsoft Enterprise AI Governance, Ethics & Security

Now that you have completed the Enterprise AI Governance, Ethics & Security program, you stand out with a unique set of skills and knowledge in responsible AI governance, risk management, and secure AI operations. This certificate demonstrates your job readiness and can be shared with your professional network. Throughout this program, you engaged with instructional videos, assessments, and practical exercises, gaining a deep understanding of key aspects of AI governance, including: designing AI governance frameworks with RACI matrices and ISO/IEC 42001; applying Microsoft's Responsible AI principles to score use cases and mitigate bias; quantifying AI risk using the NIST AI RMF and FAIR methodology; and protecting personal data and securing model deployments in Azure ML environments.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
