

13 Courses

Introduction to Data Engineering

Introduction to Relational
Databases (RDBMS)

SQL: A Practical Introduction for
Querying Databases

Hands-on Introduction to Linux
Commands and Shell Scripting

Relational Database
Administration (DBA)

Data Warehouse Fundamentals

Introduction to NoSQL Databases

ETL and Data Pipelines with Shell,
Airflow and Kafka

Introduction to Big Data with
Spark and Hadoop

Data Integration, Data Storage, &
Data Migration

Data Privacy, Security,
Governance, Risk and Compliance

Enterprise Data Architecture and
Operations

Data Architect Capstone Project

SkillUp

Nov 14, 2025

JHON FELIPE URREGO MEJIA

has successfully completed the online, non-credit Professional
Certificate

IBM Data Architecture

This Professional Certificate provides an understanding of core data architecture concepts, tools, and practices. The learners gained foundational skills in data engineering, SQL, and relational databases, along with essential technical proficiencies such as Linux commands, shell scripting, and database administration. They explored advanced topics, including data warehousing, NoSQL databases, and building ETL workflows with tools such as Airflow and Kafka. They learned to analyze large datasets using Spark & Hadoop. They gained critical abilities in data integration, storage, migration, & architecture design. By completing the hands-on labs and a capstone project, learners demonstrated their ability to design and implement data systems while ensuring governance, privacy, and compliance.
