JHON FELIPE URREGO MEJIA

has successfully completed the online Professional Certificate

IBM Systems and Solutions Architect

With this certificate, you'll be prepared to work on systems architecture projects that involve designing and documenting enterprise architectures and modeling business processes using ERDs and DFDs. You'll learn to align IT infrastructure with business objectives and integrate cloud platforms, DevOps pipelines, and containerization tools such as Docker and Kubernetes. You'll also apply security frameworks and compliance strategies, plan for scalability and disaster recovery, and analyze system performance and reliability. In addition, you'll gain experience managing stakeholders and project requirements, as well as developing enterprise data architecture, integration, and migration strategies.

Antonio Cangiano

Antonio Cangiano
Director, IBM Skills
Network

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
