7 Courses

Foundations of AI Native Data Engineering

AI Systems, Automation, CI/CD and Data Engineering Workflows

Vector Databases and Retrieval Data Engineering

Lakehouse Architecture for AI-Native Data Platforms

Unstructured Data Engineering for AI

Reproducible Training Data and ML-Ready Data Pipelines

Capstone: Build and Operate an AI-Native Data Platform

Sep 15, 2026

Antonio Cangiano
Director, IBM Skills Network

Ruslan Dodgacte
Lead Instructor, intela.io

JHON FELIPE URREGO MEJIA

has successfully completed the online Professional Certificate

IBM AI-Native Data Engineering

This certificate recognizes completion of advanced training in AI-native data engineering. Learners demonstrated the ability to design, build, validate, and operate production-grade data platforms for AI workloads, including lakehouse architectures, vector retrieval systems, unstructured data pipelines, reproducible ML-ready datasets, and governed operational workflows. They also completed applied project work showing architecture decisions, implementation planning, governance controls, observability, and business value in an end-to-end AI-native data platform.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
