JHON FELIPE URREGO MEJIA

has successfully completed the online Professional Certificate

Microsoft Cybersecurity Architecture

Now that you have completed the Cybersecurity Architecture Professional Certificate, you stand out with a unique set of skills and knowledge in enterprise security strategy and engineering. This certificate demonstrates your job readiness and can be shared with your professional network. Throughout this program, you've engaged with instructional videos, assessments, and practical exercises and gained a deep understanding of key aspects of enterprise protection, including creating enterprise-wide cybersecurity roadmaps; validating security controls through CI/CD pipelines and proactive testing; and engineering advanced SIEM detections and Zero Trust architectures.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
