JHON FELIPE URREGO MEJIA

has successfully completed the online Professional Certificate

IBM Enterprise AI Transformation and Consulting

AI transformation consultants help organizations decide where AI is worth the investment, whether they are ready, and how to make it work responsibly. This IBM Professional Certificate prepares you for that role, with no prior experience or coding required. Across seven courses, you learn to identify and prioritize high-value AI use cases, assess AI readiness across data, technology, and people, design a phased AI transformation roadmap, build an ROI business case, apply AI governance and risk management frameworks, and present AI strategy to senior leaders. Every course includes hands-on practice and ends with a professional deliverable. In the capstone, you create a complete AI transformation strategy for a realistic company, making and defending your own recommendations.

LearnQuest's Instructor Network is comprised of professionals across hundreds of technology disciplines from around the world.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
